SUMMARY

Data Analyst with hands-on experience in data modeling, and business intelligence solutions. Skilled in querying multi-million-row databases using SQL, building automated interactive dashboards, and performing statistical analysis in Python and Excel. Proven track record of automating operational workflows to reduce processing delays and deliver actionable, data-driven business insights.

PROJECTS

TheLook E-Commerce Data Analytics & Forecasting **July 2026 – August 2026**
(SQL, Power BI, Python, ML, Scikit-Learn, Prophet)

- **Database Modeling & Querying:** Cleansed and structured 2.2M+ records across 7 relational tables in PostgreSQL; built Entity Relationship Diagrams (ERD) to optimize query performance.
- **Advanced SQL Analytics:** Executed 40 complex business case studies utilizing CTEs, Window Functions (LEAD, LAG, ROW_NUMBER), and DATE_TRUNC to compute AOV, Churn Rate, and 30-day rolling revenue.
- **Key insights:** 87.8% of customers bought only once, and repeat buyers returned after about 190 days on average. Adults aged 26–59 drove about 57% of revenue. 13 of 26 categories generated 80% of revenue (Jeans and Outerwear lead), and Blazers & Jackets had the highest margin at 62%.
- **Interactive BI Dashboards:** Designed a multi-page Power BI dashboard featuring dynamic DAX measures (CALCULATE, FILTER) and Dynamic Row-Level Security (RLS) for personalized user access control.
- **Predictive Sales Modeling:** Trained Linear Regression, Random Forest, and Facebook Prophet models on historical transactional data to forecast monthly order volumes, evaluating performance via MAE, RMSE, and R^2 metrics.
- **AI-Powered Insights & Storytelling:** Used Claude AI to streamline SQL optimization, insight generation, and presentation creation, converting complex analysis into an executive-ready PowerPoint deck.

PwC Allocation Dashboard (Microsoft Excel, Dashboard Automation) **Feb 2025 – Present**

- **Developed an interactive Excel dashboard** to track daily client onboarding and risk management requests using **Pivot Tables, Pivot Charts, Slicers, and Conditional Formatting**.
- **Automated reporting** using advanced Excel functions including **SUMIFS, AVERAGE, IFS, COUNTIF/COUNTIFS, and IF**, and implemented a **Refresh** button using **recorded macros** to streamline dashboard updates and enhance the user experience.
- **Monitored key operational KPIs** including total requests, completed vs. pending requests, monthly request trends, request type distribution (PRID, KYC, CAF, AFS, EA, RC, IFA), daily workload, and average requests through dynamic visualizations.
- **Built automated summary reports** with interactive filters, enabling stakeholders to monitor team performance, request timelines, and operational productivity in real time.

SKILLS

Technical Skills

Programming & Querying: Advanced SQL (PostgreSQL, MySQL), Python (Pandas, NumPy, Matplotlib, Seaborn).

Data Visualization & BI: Microsoft Power BI (DAX, Power Query, RLS), Tableau, Google Looker Studio, MS Excel (Dashboards, Pivot Tables).

Analytics & Machine Learning: Exploratory Data Analysis (EDA), Regression, Scikit-learn, Predictive Modeling, Forecasting.

Cloud & Tools: Amazon Web Services (AWS), Salesforce CRM, Jupyter Notebook.

Data Methodologies: Data Cleansing & Transformation, Data Modelling, ETL Pipelines, Business Intelligence.

Soft Skills – Teamwork, Critical Thinking, Problem Solving, Flexibility, Adaptability.

EXPERIENCE

PricewaterhouseCoopers (PwC) (Ahmedabad, Gujarat) **Feb 2025 – Present**

Risk & Management Analyst

- Analyzed **2,000+ client onboarding and risk management requests**, identifying workflow bottlenecks and improving PRID processing efficiency by **40–50%** while ensuring compliance with internal risk policies.
- Managed high-volume operational datasets, processing **850+ Engagement Acceptances, 600+ KYC requests, 350+ Relationship Checks, and 200+ AFS approvals** while maintaining data accuracy across CES, UniRisk, Precision Plus, and Salesforce CRM.
- Monitored onboarding KPIs and optimized approval workflows by coordinating timely Engagement Acceptance and Relationship Check submissions, reducing turnaround time and improving operational efficiency.
- Developed an interactive **Excel dashboard** using Pivot Tables, Pivot Charts, Slicers, advanced formulas, and macros to track request trends, workload distribution, and team productivity, enabling real-time operational reporting.

Vanguard Ventures (Thane, Maharashtra) **Sept 2024 – Nov 2024**

Data Analyst Intern

- **Process Automation:** Engineered an automated attendance tracking system using Google Sheets and Forms, eliminating an 8-day salary processing delay.
- **Performance Analytics:** Developed real-time monitoring dashboards in Google Data Studio for presales, sourcing, and closing teams to track conversion metrics.
- **Financial Reporting:** Partnered with the accounts team to build a sales and profit analysis dashboard in Google Data Studio, evaluating presales financial returns.
- **Market Insights:** Extracted, cleansed, and visualized regional real estate trends using Power BI and Microsoft Excel.

CERTIFICATES

- **Google** Advanced Data Analytics — May 2026
- **Google** Data Analytics — Apr 2026
- **PwC** – Power BI Job Simulation. — Apr 2024
- **TATA** – Data Visualization: Empowering Business with Effective Insights. — Jan 2024
- **Quantium** – Data Analytics Job Simulation. — Dec 2023
- Data Manipulation in Python: Master Python, Numpy & Pandas. — Nov 2023

EDUCATION

University Of Mumbai **2021 - 2024**
Bachelor of Commerce
